GNSS Module Certification
Benefits

Market entry

- Promotion of your GNSS module on DT websites
- Pre-qualification for the Deutsche Telekom portfolio
- Pre-qualification for an integration to DT's IoT Solution Optimizer platform

Wide feature scope

- Performance testing focus on GNSS modules:
  - GPS, GLONASS, hybrid
  - Power consumption
  - Time-to-First-Fix (TTFF)
  - Almanac, Ephemeris, Assisted GPS (A-GPS)
  - Accuracy
  - Feature support
- Operation modes: Automatic, Continuous, Host CPU, Manufacturer default

Service package

- Testing service delivered by Deutsche Telekom resources
- Negotiable number of test rounds prior to certification
- Confirmed priority test slots
- Issue management and troubleshooting
- DT Certification Report: found issues & workarounds, performance KPIs
- Signed Certification Letter

Improved business case

- DT identifies issues up front for you with logging support
- Experience less in-field customer positioning issues
- Customers assured that the module performs properly
- Deutsche Telekom guides customers in integration activities and best practices for your module
